

# DV P-CAM 2000

- Hi-definition of Video and Audio
- Capture video for evidence
- Pen shape for almost undetectable surveillance
- Highly discrete "secret agent pen" features a built-in 2GB flash memory and it is capable of recording almost 5 hours of video with audio.
- The video is encoded on the fly through a buffer system to MPEG 4 and if the battery runs low during a recording session the pen will ensure it writes the video from the buffer to flash before shutting down. All video is captured with audio making this the perfect tool for recording confessions, secret rendezvous or interviews.

## Technical Datas

Pen type	Rubber Finger Grip
Ink	Universal Replaceable Ink Cartridge
Connection	Easy USB Charging/ Transfer
Battery use time	about 2h
Record time	up to 5h
Media	Internal Flash Memory: 1GB
Camera	Improved CMOS sensor
White Balance	Auto Adjust
Focus Range	150mm~Infinity
Format	MPEG4 -AVI
Frame Rate	15fps
