

EDIC MINI B5

Digital Voice Recorder Edic Mini is intended to record voice messages within the frequency band 300 - 3400 Hz in flash memory. It can play back stored messages using an earphone or download the messages to a personal computer as standard sound files.

The B5 has small overall dimensions and weight, long battery life, long record time, a high-sensitive built-in microphone (range up to 8 meters), and wide dynamic range. Due to the absence of moving parts, the DVR is efficient in a broad range of temperatures, as well as conditions of shaking and high dust content. The B5 is connected to the computer with the supplied adapter. The supplied software allows saving recorded messages as standard sound files in .wav format with a date / time stamp.

Since the B5 has no moving parts, it can safely operate in a wide environmental range, without being detected by any special equipment.

Technical Datas

battery life	17 hour battery life in record mode 3 month battery life in stand-by mode
Size	44 x 24 x 8 mm
Weight	9 grams
Record time	Up to 150 hours of storage capacity
