

# FIBERVISION 6000V

## Features

- 2.8mm Objective Lens.
- Ø4mm flexible cable.
- Video Camcorder attachable

The release of Fibervision 6000V was very sensational and accepted by the various people in investigation field. Especially, law enforcement agency and police department. Using plastic fiber we succeeded to keep the cost lower and maintain its high quality, flexibility and light weight.

Image is much different from that of CCD camera. When you use fiberscope with vidie camcorder, you can see fibers on the screen also. Be sure basically the fiberscopes are used to take a close picture.

Fibervision 6000V can not be used for medical use.
